

RE: Reference for Alex

I hired Alex in May 2016 to be the Lead Developer in my supply chain finance technology startup, EarlyAce. We worked together until January 2018 when I decided to close the company.

As a direct result of Alex's work, my company raised £300k in investor funding over 3 years and built a very impressive application.

Alex helped hire and manage a talented team of 4 (2 developers, 1 designer and a tester). His skills as a developer and manager were very impressive. He helped keep the team motivated even during the tough times of the startup journey.

Alex is also one of the most hardworking and intelligent people I worked with. We worked many weekends and late nights together to release the application and then worked even harder to make iterations to the application for clients and investors.

I would wholeheartedly recommend Alex. He would be an asset for any organisation and works well within a team environment. He will go the extra mile to deliver on time.

I am happy to speak over Skype and give you more details about Alex if it's necessary.

Kind regards,

Simba

Founder @ EarlyAce Limited
